

Suntastic 1000 Branded Solution Dyed Woven Polyester Fabrics

Developed by American Decorative Fabrics, this new category of Performance fabrics represents forward fashion, high durability, easy care, softer hand plus value oriented options for Indoor and Outdoor Living. With a UV rating of more than 1,000 hours and abrasion for textures of over 50,000 Double Rubs, this Collection represents a unique new opportunity for the worlds of both Residential and Hospitality decoration. These fabrics are available in textured Solids, Stripes, Jacquards and Embroideries etc.

Suntastic 1000 is made of recyclable solution dyed polyester

Solution dyed polyester is given its color by applying the dye directly into the molten polymer. This process is friendlier to the environment and eliminates the waste water and effluent discharge associated with piece dyeing or yarn dyeing. The UV performance of this process is over 25 times greater than the residential industry standards for color fastness to UV exposure. The color transfer and crocking performance is improved to the maximum rating of industry standards.

Care and Cleaning Instructions:

To keep Suntastic 1000 fabrics looking their best, use these simple and easy cleaning instructions:
Apply mild soap and warm water directly to the soiled area of the fabric with a soft brush or sponge.
Rinse thoroughly
Air dry.

For Stubborn Stains and Mildew:

Add one cup of bleach per gallon of soap and water.
Apply directly to the stain with a sponge or soft brush.
Rinse thoroughly.
Air dry.

If stains are oil-based, use some dishwasher liquid to remove the oil before proceeding as above.

Suntastic 1000 Testing Specs

SOLID SOLUTION DYED	Test Method	Suntastic 1000
Wyzenbeek Abrasion	ASTM D 4157-13	> 50,000 rubs
Light Fastness	AATCC 16.3	Grade 4.5 - exceeds 1000 hours
Dry Crocking	AATCC 8 - 2013	Class 5 - no color transfer
Wet Crocking	AATCC 8 - 2013	Class 5 - no color transfer
Seam Slippage	ASTM D 4034 - 92	Exceeds Industry standards
Tear Strength (lb)	ASTM D 2261 - 13	Exceeds Industry standards
Tensile Strength (lb)	ASTM D 5034 - 09	Exceeds Industry standards
Pilling	ASTM D 3511 - 10	Grade 5 - no pilling
Fire Retardant	California TB 117 (2013)	Pass
Care & Maintenance	Refer Care Instructions	Bleach Cleanable
Bow and Skew	ASTM D 3882	Adheres to Industry Standard
Weight in grams/sq mtrs		Pattern Specific 200 to 280 g/sq mt.
Material Ingredient		100% Solution Dyed Polyester
Warranty (year)		3 year for UV Fading
Water, Soil & Oil Repellant		Permatex Finish
Anti Mildew		Permatex Finish

Don't forget to Re-Cycle

Introducing the most beautiful, most durable fabrics for Indoor and Outdoor living

Suntastic Performance Fabrics

THE BIG 4 REASONS TO BUY SUNTASTIC FABRICS FOR YOUR HOME

IT'S KID-PROOF, PET-PROOF, WEATHER-PROOF, LIFE-PROOF.....

JUST ABOUT ALL-PROOF

- WATER WASHABLE and BLEACH SAFE
- FADE RESISTANT (Colors will not CROCK or FADE)
- STAIN and MILDEW RESISTANT
- CHEMICAL FREE – no PFC's or harmful chemical finishes

SUPER EASY TO CARE FOR AND CLEAN, SUNTASTIC FABRICS KEEP THEIR COLOR FOR YEARS, REGARDLESS OF WEAR AND TEAR AND CLEANING

SUNTASTIC IS THE ULTIMATE STYLISH AND HIGH-PERFORMING INDOOR AND OUTDOOR FABRIC CHOICE - FOR YOUR FURNITURE AND CUSHIONS, FOR YOUR WINDOWS, AND DECORATIVE ACCESSORIES.

FEATURING 100% SOLUTION-DYED MATERIAL, SUNTASTIC IS ECO-FRIENDLY

Go Green with SUNTASTIC

Solution Dyed is Eco Friendly with Minimal Carbon Footprint

Solution Dyed is the key

IN THE SOLUTION-DYED PROCESS, COLOR IS ADDED DIRECTLY TO THE MOLTEN POLYMER, AND EXTRUDED INTO COLORED FIBRES. THIS RESULTS IN A 100% PENETRATION OF COLOR INTO THE FIBERS.

Because of this direct extrusion of colored polymer fibers, there's no water, no waste, and no pollutants used or produced in the dyeing process.

This is an environmentally responsible and friendly manufacturing process - there are NO effluents produced by this clean technology that protects our environment, our air, our rivers and oceans.

These high performance fabrics have high ultra violet UV resistance, so they do not fade in direct sunlight. They are ozone complimentary and cancer protecting. They will not scorch or burn in strong sunlight and high temperatures.

In addition, these fabrics are inherently mildew and mold resistant – a must for a healthy lifestyle and the great outdoors.

And the absolute plus is BLEACH CLEANABLE – easy clean with just mild detergent, water, and bleach for those stubborn stains.

Don't worry, bleach won't cause colors to fade.

Most decorative fabrics are not designed to withstand outdoor conditions – our great decor styling can happily stand up to outdoor conditions. Suntastic stands the test of time even in strong sunlight.

SUNTASTIC solution dyed yarns have 100% dyed through intensity, giving them long lasting color protection that will not rub off or fade, not even when cleaned with bleach.

For example :

when we compare a carrot to a radish you can easily see the carrot has color completely through to its core. The radish only has color penetration on the outer edge. Like the carrot, Solution Dyed Fabrics have deep color penetration resulting in the greatest lightfastness and cleanability of all textile constructions.

SUNTASTIC high abrasion textures have performance durability under intense use.

SUNTASTIC solution dyed fabrics exceed both indoor and outdoor UV requirements.

SUNTASTIC high performance fabrics are great for active people, and families,... and pets.

Best of all SUNTASTIC fabrics are 100% recyclable. So don't forget to re-cycle.
